

Apache Ignite

```
10
11 public class Main {
12
13     public static void main(String[] args) {
14         String igniteURL = "jdbc:ignite:thin://127.0.0.1";
15
16         try {
17             Class.forName( className: "org.apache.ignite.IgniteJdbcThinDriver");
18             Connection connection = DriverManager.getConnection(igniteURL);
19
20             Statement statement = connection.createStatement();
21             ResultSet resultSet = statement.executeQuery( sql: "SELECT * FROM SUBSCRIBER");
22
23             while (resultSet.next()) {
24                 int subscriberId = resultSet.getInt( columnLabel: "SUBSC_ID");
25                 String subscriberName = resultSet.getString( columnLabel: "SUBSC_NAME");
26                 String subscriberLastname = resultSet.getString( columnLabel: "SUBSC_SURNAME");
27
28                 System.out.println(subscriberId + " " + subscriberName + " " + subscriberLastname);
29             }
30
```
